

About Peers not Fears, LLC - An owner-operated consultancy that supports removing any and all barriers preventing students from becoming their best selves and developing essential leadership skills. This small business works to empower students, teachers, administrators, and anyone who is connected to the growth of student development. The programs developed are custom-built to address the needs of the program we work with, as identified together.

Consultant's Role: To serve as a facilitator to provide a safe place to explore leadership development opportunities and growth for the community's students. To create a sustainable program for the school if that option is chosen.

Consultant: Lorraine Connell, Peers not Fears, LLC

80 Academy Dr

Wolfeboro NH 03894

603-801-8329

Timeline: School-wide student leadership skills and school culture: 15 months recommended

Proposal - Building Leadership within YOUR SCHOOL

Background:

WHY WORKING WITH YOUR SCHOOL MATTERS - WHAT EXISTS AND WHAT WE WANT TO BUILD TOGETHER.

Purpose:

1. Work with identified students in the school to engage in activities that empower and provide students with foundational skills to develop into strong leaders.

2. Create a sustainable program for the school to continue to build on the leadership developed with the students, and implement training for future students.

Before we begin working:

Administrators collaborate with the consultant to develop and assess the goals of the program.

Consider one to two adults willing to consult and engage with the student work in order to make the program sustainable beyond work with the consultant.

Work Plan-

Developed based on individual school needs, chosen timeline, and desired results.

Deliverables-

Individual curriculum created with the adults chosen to work with the consultant to be used beyond the work by the consultant.

Individual programming created with the adults chosen to work with the consultant is to be implemented to be used beyond the work by the consultant.
